IEE Proceedings
Vision, Image and Signal Processing

Vol. 149, 2002

Author Index

A

Adi, R.W. p335
Ahmad, M.O. p140
Allinson, N.M. p51
Andreadis, I. p129
Argenti, F. p152

B

Barreto, P.S.L.M. p57

C

Ceccarelli, M. p244
Cham, W.-K. p272
Chambers, J.A. p1, p196
Chang, C.-C. p43
Chang, S.-J. p217
Chang, W.-M. p162
Chantler, M.J. p263
Chen, F.-K. p10
Chen, L.-H. p370
Chen, S. p185
Chen, S.-H. p327
Cheung, K.-W. p365
Chow, T.W.S. p225
Chung, W.-H. p304

D

De Simone, V. p244
Del Re, E. p152
Del Taglia, F. p152

F

Farhang-Boroujeny, B. p17
Ferguson, K.L. p51
Fiori, S. p347
Forsyth, N.T. p1

G

Ghose, B. p204
Guo, J.-I. p237

H

Hill, L. p63
Hong, S.-M. p168
Hsu, H.-I. p162
Hsung, T.-C. p315
Hwang, K.-F. p43
Hwang, M.-S. p43

J

Jianping, D. p211
Jing, C.Y. p27

K

Katugampala, N.N. p321
Khan, I.R. p231
Kim, H.Y. p57
Kittler, J. p179
Kondoz, A.M. p321
Kulkarni, R.G. p159

L

Lee, J.-H. p304
Leung, C.-S. p217
Liu, J.Z. p272
Lorenzo-Ginori, J.V. p290
Louverdis, G. p129
Lun, D.P.-K. p315
Luo, Y. p196

M

McGunnigle, G. p263
McLoughlin, I.V. p335
Messer, K. p179
Murli, A. p244

N

Nanda, P.K. p204
Naylor, P.A. p1
Neo, W.H. p17
Ng, K.T. p225

O

Ohba, R. p231

P

Pai, H.-F. p237
Peng, J. p283
Penny, W.D. p33
Plataniotis, K.N. p290
Po, L.-M. p365

R

Rijmen, V. p57
Roberts, S.J. p33

S

Sadeghi, M. p179
Sali, S. p253
Saratchandran, P. p211
Shih, J.-L. p370
Sundararajan, N. p211
Swain, T.N. p204
Swamy, M.N.S. p140

T

Tai, H.-M. p27
Tay, D.B.H. p341
Tio, C.M.M. p335
Tsalides, P. p129
Tse, F.-W. p272
Tseng, C.-C. p297

V

Venetsanopoulos, A.N. p290
Vlachos, T. p63

W

Wang, B.-Y. p225
Wang, H. p283
Wang, J.-F. p327
Wang, Y. p173
Wong, K.-W. p217
Woo, W.L. p253
Wu, W. p283

Y

Yan, Y.-L. p10
Yang, J.-F. p10
Yen, J.-C. p237
Yu, Y. p355
Yuan, B. p173

Z

Zan, J. p140
Zhu, X. p355

ACOUSTICS AND ULTRASONICS

Alternating fixed-point algorithm for stereophonic acoustic echo cancellation p1
Robust microphone arrays using subband adaptive filters p17

ARRAY SIGNAL PROCESSING

Robust microphone arrays using subband adaptive filters p17

ARTIFICIAL INTELLIGENCE

Bayesian multivariate autoregressive models with structured priors p33
General multilayer perceptron demixer scheme for nonlinear blind signal separation p253
Information-theoretic learning for FAN network applied to eterokurtic component analysis p347

AUDIO EQUIPMENT

Perceptual audio data concealment and watermarking scheme using direct frequency domain substitution p335
Robust microphone arrays using subband adaptive filters p17

BIOMEDICAL ENGINEERING

Bayesian multivariate autoregressive models with structured priors p33

CODES AND DECODING

Index assignment in vector quantisation for channels with memory p162

COMMUNICATION SYSTEM THEORY

Adaptive blind channel identification algorithm based on linear prediction for SIMO FIR systems p225
New voice over Internet protocol technique with hierarchical data security protection p237
Robustness evaluation of a minimal RBF neural network for nonlinear-data-storage-channel equalisation p211
Steady-state mean-square error analysis of the cross-correlation and constant modulus algorithm in a MIMO convolutive system p196

COMPUTATIONAL COMPLEXITY

Alternating fixed-point algorithm for stereophonic acoustic echo cancellation p1
Bayesian multivariate autoregressive models with structured priors p33
Candidate scheme for fast ACELP search p10
Design and implementation of a fast algorithm for modulated lapped transform p27

COMPUTER GRAPHICS

Robust authentication scheme for protecting copyrights of images and graphics p43

DATA COMMUNICATION

New voice over Internet protocol technique with hierarchical data security protection p237

DATA HANDLING

Spatial coefficient partitioning for lossless wavelet image coding p365

DATA SECURITY

New voice over Internet protocol technique with hierarchical data security protection p237
Robust authentication scheme for protecting copyrights of images and graphics p43
Toward secure public-key blockwise fragile authentication watermarking p57

DATABASE MANAGEMENT SYSTEMS

Colour image retrieval based on primitives of colour moments p370

DIGITAL ELECTRONICS

Design and implementation of a fast algorithm for modulated lapped transform p27

DIGITAL FILTERS

Boundary filter design for multiwavelets p315
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297
Taylor series based two-dimensional digital differentiators p231

DIGITAL TECHNIQUES

Robustness evaluation of a minimal RBF neural network for nonlinear-data-storage-channel equalisation p211

ELECTROMAGNETIC COMPATIBILITY

Polynomials for narrowband signal processing p159

EXPERT SYSTEMS

Fast method for face location and tracking by distributed behaviour-based agents p173

FILTERS AND FILTERING

Adaptive blind channel identification algorithm based on linear prediction for SIMO FIR systems p225
Audio decoding with frequency and complexity scalability p152
Boundary filter design for multiwavelets p315
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297
Noise-robust pitch detection method using wavelet transform with aliasing compensation p327
Nonlinear filtering for phase image denoising p290
Parallel genetic algorithm based unsupervised scheme for extraction of power frequency signals in the steel industry p204
Psychophysically derived quantisation model for efficient DWT image coding p51
Robust microphone arrays using subband adaptive filters p17
Steady-state analysis of computational load in correlation-based image tracking p168
Taylor series based two-dimensional digital differentiators p231
Two-stage, least squares design of biorthogonal filter banks p341
Use of periodic and monotonic activation functions in multilayer feedforward neural networks trained by extended Kalman filter algorithm p217
Well-posed anisotropic diffusion for image denoising p244

FORMAL LOGIC

New fuzzy model for morphological colour image processing p129

INTERFERENCE SUPPRESSION

Noise-robust pitch detection method using wavelet transform with aliasing compensation p327
Polynomials for narrowband signal processing p159

LOGIC CIRCUITS

Design and implementation of a fast algorithm for modulated lapped transform p27

LOGIC DESIGN

Boundary filter design for multiwavelets p315
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297

MAGNETIC MATERIALS AND DEVICES

Robustness evaluation of a minimal RBF neural network for nonlinear-data-storage-channel equalisation p211

MATHEMATICAL TECHNIQUES

New fuzzy model for morphological colour image processing p129
Optimal search in Hough parameter hyperspace for estimation of complex motion in image sequences p63

MOBILE RADIO

Candidate scheme for fast ACELP search p10

NEURAL NETWORKS

General multilayer perceptron demixer scheme for nonlinear blind signal separation p253
Information-theoretic learning for FAN network applied to eterokurtic component analysis p347
Robustness evaluation of a minimal RBF neural network for nonlinear-data-storage-channel equalisation p211
Use of periodic and monotonic activation functions in multilayer feedforward neural networks trained by extended Kalman filter algorithm p217

NUMERICAL ANALYSIS

Alternating fixed-point algorithm for stereophonic acoustic echo cancellation p1
Boundary filter design for multiwavelets p315
DC coefficient restoration technique and its application to image coding p272
Design and implementation of a fast algorithm for modulated lapped transform p27
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297
Fusion algorithm for multisensor images based on discrete multiwavelet transform p283
General multilayer perceptron demixer scheme for nonlinear blind signal separation p253
Index assignment in vector quantisation for channels with memory p162
Modelling and segmentation of lip area in face images p179
Multi-output regression using a locally regularised orthogonal least-squares algorithm p185

Neighbourhood-blocks motion vector estimation technique using pyramidal data structure p140
Noise-robust pitch detection method using wavelet transform with aliasing compensation p327
Optimal search in Hough parameter hyperspace for estimation of complex motion in image sequences p63
Psychophysically derived quantisation model for efficient DWT image coding p51
Steady-state mean-square error analysis of the cross-correlation and constant modulus algorithm in a MIMO convolutive system p196
Taylor series based two-dimensional digital differentiators p231
Two-stage, least squares design of biorthogonal filter banks p341
Well-posed anisotropic diffusion for image denoising p244

OPTICAL IMAGE PROCESSING

Colour image retrieval based on primitives of colour moments p370
Comparison of three rough surface classifiers p263
DC coefficient restoration technique and its application to image coding p272
Error resilience of multireference motion compensated prediction in video coding p355
Fast method for face location and tracking by distributed behaviour-based agents p173
Fusion algorithm for multisensor images based on discrete multiwavelet transform p283
Modelling and segmentation of lip area in face images p179
Neighbourhood-blocks motion vector estimation technique using pyramidal data structure p140
New fuzzy model for morphological colour image processing p129
Nonlinear filtering for phase image denoising p290
Optimal search in Hough parameter hyperspace for estimation of complex motion in image sequences p63
Psychophysically derived quantisation model for efficient DWT image coding p51
Robust authentication scheme for protecting copyrights of images and graphics p43
Spatial coefficient partitioning for lossless wavelet image coding p365
Steady-state analysis of computational load in correlation-based image tracking p168
Toward secure public-key blockwise fragile authentication watermarking p57
Well-posed anisotropic diffusion for image denoising p244

OPTIMISATION

Boundary filter design for multiwavelets p315
Candidate scheme for fast ACELP search p10
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297
Optimal search in Hough parameter hyperspace for estimation of complex motion in image sequences p63
Parallel genetic algorithm based unsupervised scheme for extraction of power frequency signals in the steel industry p204
Steady-state analysis of computational load in correlation-based image tracking p168

PARAMETER ESTIMATION

Alternating fixed-point algorithm for stereophonic acoustic echo cancellation p1
Bayesian multivariate autoregressive models with structured priors p33

PATTERN RECOGNITION

Use of periodic and monotonic activation functions in multilayer feedforward neural networks trained by extended Kalman filter algorithm p217

POWER SYSTEMS AND APPLICATIONS

Parallel genetic algorithm based unsupervised scheme for extraction of power frequency signals in the steel industry p204

SENSORS AND ACTUATORS

Fusion algorithm for multisensor images based on discrete multiwavelet transform p283

SIGNAL PROCESSING

Alternating fixed-point algorithm for stereophonic acoustic echo cancellation p1
Bayesian multivariate autoregressive models with structured priors p33
Boundary filter design for multiwavelets p315
Design and implementation of a fast algorithm for modulated lapped transform p27
Design of two-channel low-delay IIR nonuniform-division filter banks using L_1 error criteria p304
Eigenfilter approach for the design of variable fractional delay FIR and all-pass filters p297
General multilayer perceptron demixer scheme for nonlinear blind signal separation p253
Information-theoretic learning for FAN network applied to eterokurtic component analysis p347
Polynomials for narrowband signal processing p159
Steady-state mean-square error analysis of the cross-correlation and constant modulus algorithm in a MIMO convolutive system p196
Taylor series based two-dimensional digital differentiators p231
Two-stage, least squares design of biorthogonal filter banks p341

SIMULATION, MODELLING AND IDENTIFICATION

Bayesian multivariate autoregressive models with structured priors p33
Multi-output regression using a locally regularised orthogonal least-squares algorithm p185

SPEECH COMMUNICATION AND PROCESSING

Audio decoding with frequency and complexity scalability p152
Candidate scheme for fast ACELP search p10
Integration of harmonic and analysis by synthesis coders p321
Noise-robust pitch detection method using wavelet transform with aliasing compensation p327
Perceptual audio data concealment and watermarking scheme using direct frequency domain substitution p335

STATISTICAL ANALYSIS

Bayesian multivariate autoregressive models with structured priors p33
Index assignment in vector quantisation for channels with memory p162
Information-theoretic learning for FAN network applied to eterokurtic component analysis p347
Multi-output regression using a locally regularised orthogonal least-squares algorithm p185
Noise-robust pitch detection method using wavelet transform with aliasing compensation p327
Nonlinear filtering for phase image denoising p290

TELECOMMUNICATION

Audio decoding with frequency and complexity scalability p152
New voice over Internet protocol technique with hierarchical data security protection p237
